Nashik, Maharashtra, India

PROFESSIONAL SUMMARY

Software Developer with expertise in DevOps practices, cloud infrastructure, and full-stack development. Specialized in building automated, scalable systems using Docker, Kubernetes, Jenkins, and CI/CD pipelines. Proven ability to bridge development and operations through modern DevOps tooling, with strong foundations in software engineering, cybersecurity, and system reliability.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, JavaScript

Backend & Software Development: RESTful APIs, Backend Development, Object-Oriented Programming (OOP), JavaServer Pages (JSP)

DevOps & Cloud: Docker, Kubernetes, Jenkins, CI/CD Pipelines, Linux, Shell Scripting (Basic), Git, GitHub Actions, AWS Elastic Container Registry (ECR)

Web Technologies: HTML, CSS, Bootstrap, Responsive Web Design

Databases: MySQL, MongoDB, Database Design, SQL Queries, Query Optimization

Security & Reliability: Cybersecurity Fundamentals, Threat Analysis, Fraud Detection Concepts, Secure Application Practices

KEY PROJECTS

Cloud-Native Backend Application | *Node.js, Express.js, MongoDB, Docker, AWS ECR* 2025

- Developed a cloud-native backend application using Node.js and Express.js with RESTful APIs
- Integrated MongoDB with Mongoose for schema validation and persistent data storage
- Containerized the application using Docker and configured multi-container setup with Docker Compose
- Published and managed container images in AWS Elastic Container Registry (ECR)

TrustChain – Blockchain-Based Voting System | *Solidity, Ethereum, Smart Contracts, Cryptography* 2025

- Built a blockchain-based voting system ensuring immutable and tamper-proof vote recording
- Developed Ethereum smart contracts to automate vote validation, recording, and result tallying
- Applied cryptographic techniques including hashing, encryption, and digital signatures for vote security
- Designed a decentralized architecture leveraging blockchain consensus to eliminate single points of failure

Auction Fraud Detection System | *Python, Data Analysis, Fraud Detection, MySQL* 2021

- Developed an auction fraud detection system to identify untrusted products and fraudulent sellers
- Implemented rule-based analysis and pattern recognition on user feedback and complaint data
- Designed decision thresholds to automatically flag or ban fraudulent products
- Integrated MySQL for structured storage and retrieval of user, product, and complaint records

PROFESSIONAL EXPERIENCE

Cyber Security Intern

July 2022 – October 2022

Cyber Sakshar

Nashik, Maharashtra

- Completed a cybersecurity internship covering threat analysis, malware awareness, and security fundamentals
- Analyzed phishing attacks, ransomware, online scams, and social engineering techniques
- Gained introductory exposure to dark web concepts and common web security vulnerabilities
- Applied cybersecurity principles to academic projects involving fraud detection and secure system design

Web Developer Intern

June 2020 – August 2020

Sumago Infotech Pvt. Ltd.

Nashik, Maharashtra

- Developed responsive web interfaces using HTML, CSS, Bootstrap, and PHP
- Integrated MySQL databases for dynamic data storage and retrieval
- Collaborated remotely with team members following structured development workflows

EDUCATION

Savitribai Phule Pune University (SPPU)

November 2022 – June 2025

Bachelor of Engineering in Computer Engineering (CGPA: 7.02)

Nashik, Maharashtra

Maharashtra State Board of Technical Education (MSBTE)

August 2018 – August 2021

Diploma in Computer Engineering (Percentage: 87.20%)

Nashik, Maharashtra
